

SV/FILTER/EC SV/HEPA/EC

HIGH EFFICIENCY AIR FILTRATION UNITS

- E.C. TECHNOLOGY MOTOR WITH BUILT-IN ELECTRONICS
- FILTERS WITH ANTI BY-PASS SETTING
- LOW NOISE LEVEL
- PRESSURE CONNECTIONS FOR FILTER CONTROL
- DIFFERENT FILTRATION STAGES DEPENDING ON THE MODEL:
 - FILTERS F6 + F8 AND F7 + F9
 - FILTER HEPA H14
 - ACTIVE CARBON FILTER
- IDEAL FOR OFFICES AND BUSINESSES
- EASY ACCESS FOR MAINTENANCE

SV/FILTER/EC SV/HEPA/EC

SV/FILTER/EC and SV/HEPA/EC air filtration units have been especially designed for moving and filtering air, **in installations with stringent energy efficiency, filtration, soundproofing and versatility requirements.**

INSTALLATION IN ANY POSITION

This unit is ready to be installed in any position and thanks to its low profile, it is ideal to be installed inside technical ceilings or locations with limited available space.

EASY INSTALLATION AND MAINTENANCE

An inspection cover with manual locks is used for quick access for cleaning the impeller and replacing the filters.

LOW NOISE LEVEL

The 25 mm thick acoustic casing, which reduces noise through the use of high-quality insulation materials designed for these applications, makes it the perfect fan for installation in applications that require low noise levels.

ENERGY SAVINGS

The high performance E.C. Technology electric motor is a key element in reducing electricity consumption, in addition to being easy to regulate with any 0-10 V sensor.

F

FILTRATION STAGES

4 standard filtration stage configurations are available:

F6 + F8, F7 + F9, F7 + H14, G4 + CA.

The unit is equipped with a rail for installing a 25 mm pre-filter that will extend the service life of the high efficiency filters.

CONTROL OF FILTERS

The status of both filters can be individually controlled via the three pressure connections. This control prevents over-saturating each one of the two filtering stages, in a manner that reduces the electrical consumption, allows carrying out preventive maintenance and maintains the filtration efficiency.

ANTI BY-PASS SYSTEM

The higher efficiency filter fastening system guarantees a fully airtight connection between the filter and the frame.

SV/FILTER/EC

Filtration units for circular ducts and EC Technology motor

DIFFERENT FILTRATION STAGES DEPENDING ON MODEL:

- F6 + F8
- F7 + F9
- G4 + FCA

Filtration units for circular ducts, with low noise level, different filtration stage options and EC Technology motor.

Fan:

- Acoustic casing covered with sound absorbing material.
- Standardised inlet and outlet flanges with watertight joints.
- F6 + F8, F7 + F9 and G4 + CA, filters according to model.
- Easy access inspection and cleaning cover with manual fasteners.
- Centrifugal fan with a backward curved impeller.
- Integrated support into the box which facilitates its assembly.
- Linear airflow direction.
- 3 pressure taps for individual control of the two filtration stages.

- Installation in any position.
- With guide slot for 25 mm prefilter.
- More efficient filter anti-by-pass adjustment.

Motor:

- High efficiency external rotor EC Technology motors, adjustable via 0-10 V signal.
- Single-phase 220-240 V 50/60 Hz, IP54 protection.
- Maximum temperature of air to be carried: -25 °C +60 °C.

Finish:

- Anti-corrosive in galvanized steel sheet.
